

Save your resources and use ours. Let GP&C help you win.

In this time of reductions, budget cuts and uncertainty, one thing is certain — **There's no need to pay for something you don't need.**

When a standard frac plug can meet the needs of 90% of wells, why spend resources customizing one?

Let us do what we do best.

Our **HC 5.5, HC 5.0 and HC 4.5 Frac Plugs** offer a standard, reliable design compatible in 90% of wells.

We are well-equipped to supply standard high-performance frac plugs at a low cost. We are the leader in oilfield composites and a supplier of more than 1.2 million composite frac plugs to leading oil and gas manufacturers.

Low Cost/High Performance

- 5.5 rated 10k 150/8k 200
- 5.0 rated 10k 250
- 4.5 rated 10k 250
- Innovative proven materials
- Standard low-cost reliable design
- Patented bottom slip - patent number 9,157,288
- Customization available on bottom sub
- Large inventory with quick shipping
- Immediate availability

Take advantage of our 50 years of experience

- Design engineering, quality and qualification testing managed by GP&C engineering
- Quick ship and stocking programs available
- Robust inventory management system
